

Kolloquium Satellitennavigation

Galileo System Status and Future Plans

Marco Falconi

European Space Agency (ESA)

The talk will focus on the current Galileo System Status in terms of constellation and ground segment infrastructure. The system performance will be assessed in terms of positioning and timing accuracy from a user perspective taking also into account the added value that Galileo brings in combination with GPS to mass market and specialized users. Lastly an overview of the main directions and technology priorities for the preparation of the next generation will be provided.

Datum und Zeit: Mittwoch, den 17. Januar 2018, 17:15– 18:00 Uhr
Ort: Technische Universität München, **Room N 1414**
Co-Organisation: Christoph Günther, Urs Hugentobler, Thomas Pany,
Bernd Eissfeller, Roland Pail, Thomas Wunderlich, Patrick Henkel
